

Alphabet Train - Choo Choo!

Over the next month, create an alphabet train. This week, focus on the letters A-G. Using a variety of colored papers, draw a train car on blank pieces of paper. You may cut out the train engine below, to attach the train cars behind, or create your own. Write the letter A on one car, the letter B on the next, etc. all the way to the letter G.

Brainstorm words that begin with those letters and find something in your house to remind your child of that letter and glue it on the train car. For example, you might glue almonds on the car with the letter A, or grass on the car with the letter G.

Connect the train cars together and hang them where you can see them. Discuss the letters and get ready to add more next week! As you drive through town, point out the various items that you see that start with the letters that you have added to create your train.
