

Color Weave

Using a variety of colored strips of paper or fabric, teach your child how to weave. Attach (using tape or yarn) the fabric or paper in horizontal strips to a piece of square paper or fabric. Only attach the far right side and the far left side of the horizontal strips, so that your child can weave in and out of them. Then, using the other strips, teach your child how to weaver vertically going over and under the other strips. Talk about going UNDER and OVER and slowly create a weaving pattern of amazing colors. How much help did your child need to weave? What types of things can be created using a colorful weave? Look for weaves in fabrics, carpets or rugs and talk about the various colors in your home.
