

## NumberTrain - Choo Choo!

Over the next month, create a number train. This week, focus on the numbers 0-2. Using a variety of colored papers, draw a train car on blank pieces of paper. You may cut out the train engine below, to attach the train cars behind it, or create your own.

Write the number 0 on one car, the number 1 on the next, and the number 2 on the next.

Using cereal, crackers, beads, buttons, etc. have your child glue the appropriate number of items on the car train representing that number. (For example, glue no items on the train car with a zero, glue 2 items on the train car with the number 2, etc.)

Connect the train cars together and hang them where you can see them. Discuss the numbers and get ready to add more next week! As you drive through town, point out various items that you see and count them to continue to reinforce the numbers around us in our world.
