

NumberTrain – Choo Choo!

This is the last week to create your number train. This week, focus on the numbers 9 & 10. Using a variety of colored papers, draw a train car on blank pieces of paper. You may cut out the train engine below, to attach the train cars behind it, or create your own. Write the number 9 on one car and the number 10 on the next.

Using cereal, crackers, beads, buttons, etc. have your child glue the appropriate number of items on the car train representing that number. (For example, glue 9 items on the train car with a 9 and glue 10 items on the train car with the number 10.)

Connect the train cars together and hang them where you can see them. Celebrate the accomplishment of working on a project all month! Great Job!
