

My Own Constellation

What You Need:

- Paper
- Paint or stickers
- Chalk

What You Do:

- Give your child black paper. Let them either use paint to make stars or use star stickers. Finally they can connect the stars with paint or chalk and make their own constellation.
- Have them name their constellation and talk about how constellations in the sky are named all different names.
- At night, take a blanket outside and see if you can find any constellations.
