

# Decorative Shells

## What You Need:

- Large Pasta Shells
- Paint

## What You Do:

- Give your children large pasta shells (the bigger the better) and have them paint them any way that they want. Explain to your children that no two shells are the same just like their shell creations are all different.
- You can add google eyes and pipe cleaners to create various animals living in the shell.
- Talk about how different animals live inside of shells and how they grow and move into a new shell.
