

Q-Tip Snowflake

What You Need

- Q-Tips (or craft sticks)
- Glue
- Wax Paper
- Glitter

What You Do:

- Give each child small circles cut from wax paper. Have them glue on Q-tips in the rough shape of a snowflake with all touching in a middle puddle of glue. Sprinkle glitter onto the snowflake, and then let it dry for a couple of days. When it is dry you can peel it from the paper and you have a wonderful snowflake

Note: You can also use colored paper and let them leave it on the paper

Note: Add string before it dries to make the snowflake an ornament.
