

Heart Man

1. Cut a very large heart out of pink construction paper.
2. Cut out four strips of pink paper that are about one inch wide and 11-12 inches long.
3. Cut out two hands and two feet, using the template below.
4. Take each of your strips of paper and fold them like an accordian so that when they are folded they are about an inch square. These are the heart man's arms and legs.
5. Glue them into the right spot on the heart, which is the head and body of the heart man. Now glue the hands and feet onto the ends of the "funny" arms and legs. Draw a face onto your heart man.
