

Popsicle Stick Construction

What You Need:

- Popsicle Sticks
- Glue
- Paper
- Markers

What You Do:

After talking about construction, give your children the materials and let them decorate their Popsicle sticks. Then, have them create a building on their paper and name their building. Talk about how someone comes up with an idea and works very hard to eventually turn that idea into an actual building. Encourage them to be as creative as possible as they imagine and create any type of building they can think of. What would people do in their building? Where would their building be located? Who would use their building?
