

# “Hop On Pop” Measuring Game

Together, read “Hop On Pop” by Dr. Seuss

After reading, have your child stand in one spot and see how far they can jump or hop forward.

Figure out a variety of ways to measure how long the hop was. Use yarn, tape, feet, hands, blocks, spoons and finally a measuring tape or ruler.

Create a graph showing all the different measurements of the jump or hop!

How many different things can you find to measure?
