Paint a Winter Picture

Materials Needed:
12x18 piece of blue construction paper
a variety of colored construction paper
glue stick
white glue
shaving cream
Popsicle stick
small paintbrush

Make a wintry scene on the 9 x 12 piece of blue construction paper. Cut out shapes of a house, garage, roofs, and small evergreens. Attach the cutouts to the paper with a glue stick. In a small plastic bowl, stir together equal parts white glue and shaving cream using a popsicle stick. Your child can paint the paper with this snowy mixture, which dries hard and puffy in about an hour.
