

Nest and Egg Matching

Use 5 paper plates and write the number 1 on one plate, the number 2 on another, and so on until you 5 plates with numbers on them. Your child can decorate each plate to look like a nest. Choose something in your house to represent eggs. You can use beans, marbles, bouncy balls, etc. They can also make eggs out of construction paper. Have your child place the correct number of “eggs” on the corresponding “nest.” Practice pointing to each “egg” and count it out loud as your point to it. How many eggs are there in total?
