

## The Letter R: What is inside a RADIO?

Find an old radio that is broken or no longer used. You can go to a thrift store and easily find one. Using a screw driver, have your child take apart the radio and figure out what is inside? How does a radio work? What parts are important to make it play music? Let them enjoy taking it apart and putting it back together if they would like. Talk about how important it is for every part to work in order for the radio to function.
